

Description and Investment Strategy

The Value Fund is a PIE (Portfolio Investment Entity) which seeks to provide investors with long-term capital growth and income by directly investing in equities on a global basis, while at the same time adhering to a “Margin of Safety” investment philosophy. The strategy of the Value Fund is to primarily invest in equity securities (listed and unlisted) trading at a discount in relation to their net asset value, with low debt levels, and which have a history of paying dividends and/or returning capital to shareholders. Elevation Capital implements this approach by initially screening for securities based on the following basis:

Elevation Capital will then conduct a qualitative overlay to:

- Identify potential hidden assets on the balance sheet [e.g. real estate or investment assets at historic cost];
- Review / assess debt profile and contingent liabilities;
- Review industry consolidation history / data;
- Discount intangibles / goodwill where appropriate;
- Attempt to avoid poor management, whose interests are not aligned with shareholders.

These steps allow Elevation Capital to arrive at what it expects to be a conservative appraisal of the underlying intrinsic value.

Elevation Capital's bottom-up, proprietary research may lead the Fund to investment opportunities in medium and smaller capitalisation companies in out-of-favour or overlooked industries / sectors. The Fund invests long only and is indifferent to index compositions. Given our strict value discipline the Fund may hold a portion of assets in cash during periods when attractive investments cannot be found.

The Fund has the ability to hedge foreign currency exposures at Elevation Capital's discretion.

Please see separate Risk Disclosure Statement on page 3 for further important information.

 Performance returns are calculated using exit price to exit price, net of taxes and ongoing fees, but excluding entry costs and any individual taxes. The performance quoted represents past performance, which does not guarantee future results. The investment return and principal value of an investment in the Fund will fluctuate, so that an investor's units in the Fund, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted.

Morningstar Rating™

Overall*

3 Year*

*As at 28 February 2013

Morningstar Rating™ Definition

The Morningstar Rating is an assessment of a fund's past performance – based on both return and risk – which shows how similar investments compare with their competitors. A high rating alone is insufficient basis for an investment decision.

Total Expense Ratio

Year Ending 31 March	2013*	2012	2011	2010	2009**
TER % (Performance Fees included)	2.01%	1.89%	2.55%	2.40%	1.07%
TER % (Performance Fees not included)	2.01%	1.89%	2.25%	2.01%	1.07%
Average Funds Under Management	NZ\$ 14,583,474	NZ\$ 11,818,561	NZ\$ 3,361,43	NZ\$ 926,313	NZ\$ 514,992

Total Expense Ratio Definition***:

Total Expense Ratio (TER) expresses the expense ratio for a sub-fund or a type of share against the average NAV (of the sub-fund or unit respectively) over a given period in the past. The TER should reflect the past record, and should not be an estimate for the present or future. In other words, the TER is the annual percentage reduction in investor returns that would result from operating costs if markets were to remain flat and the fund's portfolio were to be held and not traded during a period.

Formula:

TER = (Total Expense / Average NAV) * 100

Total Expenses:

The total expenses include any legitimate expenses**** such as Management fees, depository bank fee, administrative costs, audit fees, publication expenses Sundry expenses, taxes and duties, custody fees, marketing fees, legal advisers' fees Registration fees and duties, performance fees*****

*2013 based on unaudited figures as at the date of this month-end summary.

**4-Month Period – TER has been annualised

***Source: Morningstar

****Legitimate expenses should include any of the funds, or any invested sub-funds. The most common method to include the sub-funds expense would be to pro-rata its own TER into the overall funds TER.

*****The ISI standard does not include performance fees. However if there is a performance fee in the fund two TERs should be shown (as above). One including performance fees and one excluding performance fees.

Risk Disclosure Statement

Elevation Capital Management Limited is a Registered Financial Service Provider in New Zealand in accordance with the Financial Service Providers (Registration and Disputes Resolution) Act 2008 – FSP # 9601.

Elevation Capital Management Limited does not provide personalised investment advisory services to the public. Nothing herein should be construed as a general advertisement of investment advisory services or a solicitation of prospective clients for investment advisory services. The information herein is intended solely to provide certain background information about the Elevation Capital Value Fund.

The information contained in this report has been prepared solely for informational purposes. It is not an offer to buy or sell or a solicitation of an offer to buy or sell units in the Elevation Capital Value Fund, a recommendation of any security or to participate in any trading strategy. If any offer of units in the Elevation Capital Value Fund is made, it shall be pursuant to a definitive Investment Statement and Prospectus prepared by or on behalf of the Elevation Capital Value Fund. Any decision to invest in the Elevation Capital Value Fund should be made only after reviewing the definitive Investment Statement and Prospectus (available free of charge at www.elevationcapital.co.nz or by contacting Elevation Capital Management Limited, PO Box 911145, Victoria Street West, Auckland 1142, New Zealand), conducting such investigations as the investor deems necessary and consulting the investor's own investment, legal and tax advisors in order to make an independent determination of the suitability and consequences of an investment in the Elevation Capital Value Fund.

All performance data, portfolio composition data and risk targets contained in this report are subject to revision by Elevation Capital Management Limited and are provided solely as a guide to current expectations. There can be no assurance that the Elevation Capital Value Fund will achieve any targets or that there will be any return on or of capital.

International investments involve special risks, including currency fluctuations, lower liquidity, different accounting methods, economic and political systems. These risks are typically greater in emerging markets. The Elevation Capital Value Fund may invest a significant portion of its assets in the stocks of small and medium-sized companies, which tend to be more volatile and less liquid than those of large companies, may have underperformed the stocks of larger companies during some periods and tend to have a shorter history of operations than larger companies. Potential investment risks are discussed in the Investment Statement and Prospectus.

Elevation Capital Management Limited, its directors, employees and agents believe that the information herein is correct at the time of compilation; however they do not warrant the accuracy of the information. Save for any statutory liability which cannot be excluded, Elevation Capital Management Limited further disclaims all responsibility or liability for any loss or damage which may be suffered by any person relying on any information or any opinions, conclusions or recommendations contained herein whether that loss or damage is caused by any fault or negligence on the part of Elevation Capital Management Limited, or otherwise.
