

The Fund is a Portfolio Investment Entity (PIE) that seeks to provide investors with long-term capital growth and income by directly investing in equities on a global basis, while at the same time adhering to a "Margin of Safety" investment philosophy. The strategy of the Value Fund is to primarily invest in equity securities trading at a discount in relation to their net asset value, with low debt levels, and which have a consistent history of paying dividends and/or returning capital to shareholders.

 ** Financial year to date (FYTD) for year beginning - 1 April 2013

 *** Calendar year to date (CYTD) for year beginning - 1 January 2014

All performance returns detailed above are calculated using exit price to exit price, net of taxes and ongoing fees, but excluding entry costs and any individual taxes. The returns include reinvestment of all distributions. The performance quoted represents past performance, which does not guarantee future results. The investment return and principal value of an investment in the Fund will fluctuate, so that an investor's units in the Fund, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted.

*** The high-water mark unit price is the unit price that Elevation Capital Management Limited is required to exceed before receiving a performance fee. The high-water mark is currently well above the performance fee benchmark because prior to the fund merger with the former Elevation Capital Multi Strategy Fund (which occurred 30 September 2011), the Elevation Capital Value Fund had a performance fee of NZ CPI + 5% per annum. At the time of the fund merger the Manager sought Unitholder approval to change the performance fee benchmark to an equity market benchmark (MSCI World Value Index + 2% per annum) but the Manager did not request a reset of the previous high-water mark.

All Fees charged by Elevation Capital Management Limited, the Trustee and the Fund Administrator are detailed in the Investment Statement, Prospectus and Establishment Deed. All of which are available at www.elevationcapital.co.nz or on request free of charge from the Manager.

Total Expense Ratio Definition: Total Expense Ratio (TER) expresses the expense ratio for a sub-fund or a type of share against the average NAV (of the sub-fund or unit respectively) over a given period in the past. The TER should reflect the past record, and should not be an estimate for the present or future. In other words, the TER is the annual percentage reduction in investor returns that would result from operating costs if markets were to remain flat and the fund's portfolio were to be held and not traded during a period.
