International investments involve special risks, including currency fluctuations, lower liquidity, different accounting methods, economic and political systems. These risks are typically greater in emerging markets. The Elevation Capital Value Fund may invest a significant portion of its assets in the stocks of small and medium-sized companies, which tend to be more volatile and less liquid than those of large companies, may have underperformed the stocks of larger companies during some periods and tend to have a shorter history of operations than larger companies. Potential investment risks are discussed in the Investment Statement and Prospectus for the Elevation Capital Value Fund.
