Elevation Capital Global Shares Fund
Elevation Capital Management Limited

The fund update was first made publicly available on 12 October 2022

1. WHAT IS THE PURPOSE OF THIS UPDATE?

This document tells you how the Elevation Capital Global Shares Fund ('Fund') has performed and what fees were charged. The document will help you to compare the Fund with other funds.

Elevation Capital Management Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

2. DESCRIPTION OF THIS FUND

The Fund mainly invests in the shares of listed companies, although it may invest in unlisted companies up to a total limit of 10% of Net Asset Value of the Fund. The companies we invest in may be based and operate anywhere in the world.

The principal objective of the Fund is to achieve positive absolute returns after fees and expenses, but before tax over the long term (that is a period of at least five years). The investment objectives and policy for the Fund are broadly drafted so as to provide us with the mandate to seek on behalf of investors' long-term income and capital growth by directly investing in shares (equities) on a global basis.

Total value of the fund:	\$28,119,550
The date the fund started:	9 December 2008

3. WHAT ARE THE RISKS OF INVESTING?

Risk indicator for the Elevation Capital Global Shares Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter. Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five years to 30 September 2022. While risk indicators are usually relatively stable, they do shift time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement ('PDS') for more information about the risks associated with investing in this fund.

9. NOTES

* We changed the Market Index from 5 May 2022 as we believe the MSCI All Country World Index (ACWI) is a better reflection of the actual investment markets of the Elevation Capital Global Shares Fund - it should not be compared only to Value stocks within world markets as it also invests in Growth stocks. To enable investors to compare the Fund with a global indice without a style bias is a more accurate gauge in our view. It also provides a better benchmark from a “value for money” perspective - albeit it is still reported gross (before any costs).

** There are no performance fees charged by the Fund.

*** The target investment mix indicates what are expected to apply over the course of an economic cycle and should be considered as a general indication only. Elevation Capital Management Limited is an active manager and may at times deploy investment strategies that differ materially from the targets.

**** The Manager has the ability to hedge foreign exchange exposures within the fund at its discretion. Since inception, the fund has never executed (or put in place) a foreign exchange contract for hedging purposes.
