The performance returns detailed above are calculated using exit price to exit price, net of fees and ongoing fees, but excluding entry costs (if any) and any individual taxes. The returns include reinvestment of all distributions. NZ domiciled investors can see net returns (after individual taxes) based on their relevant PIR. The performance quoted represents past performance, which does not guarantee future results. The investment return and principal value of an investment in the Fund will fluctuate, so that an investor's units in the Fund, when redeemed, may be worth more or less than their original cost.
Current performance may be lower or higher than the performance data quoted.

* Net of fees, expenses and taxes (accrued in the Fund).
** The average cash balance calculation is based on month end data from the Fund Administrator (MMC Limited) reports.

Fund Performance (Net & Gross) vs. NZ CPI+5% (Gross) & FTSE All World Index (Net Return)

For comparative purposes we have detailed two informational benchmarks we consider relevant to underlying (and prospective) investors in the Global Shares Fund. These are NZ CPI + 5% per annum (Gross Return) which we believe highlights to investors whether we are preserving and growing their real purchasing power overtime and the FTSE All World Index (Net Return) in NZD terms*. It is important to consider that our portfolio does not track or follow any index (refer the Funds Active Share statistics on page 4), and we consistently operate with conservative cash levels. We would also highlight that these two informational benchmarks are not provided for performance fee calculations as there are no performance fees charged or payable within/by the Fund.

* Total Expense Ratio Definition: Total Expense Ratio (TER) expresses the expense ratio for a fund or unit of a fund against the average NAV (of the fund or unit respectively) over a given period in the past. The TER should reflect the past record, and should not be an estimate for the present or future. In other words, the TER is the annual percentage reduction in investor returns that would result from operating costs if markets were to remain flat and the fund's portfolio were to be held and not traded during a period.

Elevation Capital Management Limited is licensed under the Financial Markets Conduct Act 2013 as a manager of registered schemes.

Elevation Capital Management Limited does not provide personalised investment advisory services to the public. Nothing herein should be construed as a general advertisement of investment advisory services or a solicitation of prospective clients for investment advisory services. The information herein is intended solely to provide certain background information about Elevation Capital Management Limited and the Elevation Capital Global Shares Fund.

The information contained in this report has been prepared solely for informational purposes. It is not an offer to buy or sell or a solicitation of an offer to buy or sell units in the Global Shares Fund, a recommendation of any security or to participate in any trading strategy. If any offer of units in the Global Shares Fund is made, it shall be pursuant to a Product Disclosure Statement (PDS) prepared by or on behalf of the Global Shares Fund.

Any decision to invest in the Elevation Capital Global Shares Fund should be made only after reviewing the Product Disclosure Statement (available free of charge at www.globalsharesfund.com or by contacting Elevation Capital Management Limited, Level 4, The Blade, 12 St Marks Road, Remuera, Auckland 1050, New Zealand), conducting such investigations as the investor deems necessary and consulting the investor's own investment, legal and tax advisors in order to make an independent determination of the suitability and consequences of an investment in the Global Shares Fund.

International investments involve special risks, including currency fluctuations, lower liquidity, higher transaction costs (in some jurisdictions), different regulatory systems and accounting methods, economic and political systems. These risks are typically greater in emerging markets.

The Elevation Capital Global Shares Fund may invest a significant portion of its assets in the stocks of small and medium-sized companies, which tend to be more volatile and less liquid than those of large companies, may have underperformed the stocks of larger companies during some periods and tend to have a shorter history of operations than larger companies. Potential investment risks are discussed in the Product Disclosure Statement (PDS) and Statement of Investment Policy (SIPO). These documents are both available free of charge on request or can be accessed: at www.globalsharesfund.com.

All performance data, fee data, portfolio composition data and risk targets contained in this report are subject to revision by Elevation Capital Management Limited and are provided solely as a guide to current expectations. ‘Independent Thinking - Disciplined Investing’

INDEPENDENT THINKING

[In-de-pend-ent Think-ing] indəpendənt THiNkiNG verb

Is essential to long-term investment success. We are often contrarian and do not pay attention to index compositions when making investment decisions. We believe that when you're several thousand miles away from Wall Street in a different nation, it's easier to be independent and buy the things that other people are selling, and sell the things that other people are buying.

DISCIPLINED INVESTING

[Dis-ci-plined In-vest-ing] disciplinəd inves'ting verb

The market presents opportunities every day, but disciplined investing is as much about the opportunities you do not take. We also believe that cash is sometimes the most attractive investment.
